

Attendees: Jim, George, Kent, Joan, CW, Arnold, Pete

1. Jun 26 - George will do Mac OS10.15 & iOS13 with emphasis on impact of loss of 32 bit apps on Mac OS. He will also cover the subscription model.

2. Future Presentations - When I include a question or issue in the meeting agenda, it is not for the purpose of getting an answer on the spot, which only benefits those at the core group meeting. It is intended to spark a discussion on the question/issue with the goal of deciding: **Can this be expanded into the topic of a future presentation?** With this in mind, here are the items discussed at the meeting:

- Mesh routers - Dave Hamilton is expert, but lives in NH; mesh router vs extender, Kent will ask at next meeting if members are interested. It was suggested that Allison would be a good one to present this. Kent will talk to her. Or maybe Don McAllister has a screencast.

- Slow Mac - Jim talked about memory pressure. How to add ram - is it easy to do yourself? No, best to go to Pacific Premier. How much ram is enough? 8 Gb is thought to be okay.

Can this be expanded into the topic of a future presentation? For example, how to customize your Mac - new graphics card, etc. Is a discussion of memory cleaners taboo? Is it true that free ram is a meaningless concept? Can Grand Perspective help with diagnosing problems?

- 2FA - The July newsletter will contain an article on this. The article uses terms that may not be generally understood.

Can this be expanded into the topic of a future presentation?

- Shortcuts/Mac status indicators - Arnold mentioned that cmd>tab will show you your open apps. Am I the only one who didn't know this? What other shortcuts or status indicators are available? **Can this be expanded into the topic of a**

future presentation?

- Wifi - George said that there is a way to determine how many devices are connected to your wifi, but he did not elaborate. He also said that he prefers ethernet. How would you find out which of your devices is a bandwidth hog? **Can**

this be expanded into the topic of a future presentation?

- Tesla battery - Arnold's battery helped him survive a 9 hour power outage. He agreed to do a presentation on this.

3. Financial, membership - 87 members. Financial is looking good thanks to Nancie and our new printing service.

Pete Myers
